

AMECAL Calibration Calendar

Certification of New Instruments:

ISO 9000 states that prior to use an instrument should be calibrated to ensure proper performance and we would always recommend that you adhere to this standard and keep a certificate as evidence. Whenever you purchase new equipment, remember to ask your supplier if they offer a calibration service. Ultimately it is for you to decide what kind of certification (if any) is appropriate for your company, the application and the equipment you have bought.

Certification Available from AMECaL:

ISO 9001 (Class I):

A Class I calibration certificate confirms that the calibration has been carried out by a company managed in accordance with a quality management system fulfilling the requirements of this international standard. It is not a technical standard, so the certificate requirements are determined by the company itself.

ISO/IEC 17025 (UKAS):

A UKAS accredited calibration certificate confirms that the calibration was done in a manner approved by the United Kingdom Accreditation Service – meeting the international standard for the Competence of Testing and Calibration Laboratories. Companies offering this are audited, approved and certified to conform to the standard.

Maintaining Confidence in Accuracy

Calibration maintains safety for both you and your customers by ensuring equipment is working correctly, within its specifications, and maintains its accuracy. Having instruments serviced at regular intervals also helps reduce the breakdown of equipment (and the effect this can have on workflow, costs and reputation). It's also a requirement of many trades, professions and quality management systems your company may be adhering to. For example, 16th/17th Edition Equipment should be calibrated to fulfil both the manufacturer's guidance and the requirements of BS EN 61557 (which normally means an annual calibration).

How often equipment should be calibrated is a question of how much it is used, how well it's been taken care of, how closely your company wants to comply with various standards and guidance and, ultimately, how much confidence you want to have in the accuracy and safety of your instruments.

Our calibration goes beyond the standard:

- Turnaround in just 3 working days
- FREE adjustments
- FREE minor repairs
- FREE quotes for larger repairs
- FREE equipment cleaning
- FREE annual calibration reminder

For orders and enquiries,
Please call: **0191 262 2266**

Technical Helpline: 09066 207 054

£0.61/min + network extras

Our technical team is ideally placed to assist you with all of your technical queries. Whether that's information on how to use a meter, fixing faults or advice on the best instrument for a particular application, our staff have many years and a broad range of technical expertise in all aspects of calibration, repair and instrumentation.

Calls = £0.61/min + network extras.18+ Only with bill payers permission.
Open 08:00-17:00 Mon to Fri. SP Digital Select Ltd, helpline - 0844 448 0165

Terms and Conditions

All specifications, illustrations and descriptions of AMECAL Products are intended to give a general idea of the Products available and are subject to alteration. We reserve the right to substitute an alternative of similar specification at our discretion. AMECAL has taken all reasonable steps to ensure the accuracy of Product information provided, but we accept no liability for any errors or omissions.

Customers are advised to check the AMECAL website for the latest information and the full Terms & Conditions, which includes details of availability, ordering, payment, pricing, shipping, returns, servicing and guarantees.

For better
mental health

Mind supports the 1-in-4 people who experience a mental health problem each year. Local Mind associations help over 220,000 people each year and the Mindinfo line, information booklets and website www.mind.org.uk give information to thousands more. Mind relies on donations and AMECAL supports their important work. For information on how you can support Mind, please email companies@mind.org.uk.
